

Dear FCC commissioners,

I am submitting this as I believe that upholding the Title II reclassification for broadband internet and, more broadly, ensuring that Net Neutrality principles guide the development and operation of broadband internet in America to be vital to our continued existence as a free and democratic society. I would like to, with respect, remind you that your duties are to the American *people* and not to the profitability of telecom companies.

It is clear that this must be undertaken by the FCC, which Mr. Pai should be well aware of given the judicial decision in *Verizon Communications Inc. v. FCC (2014)* and his status as former Verizon lawyer. The American people need you to make the right decision and stand up for us against corporate interests to preserve a free and open internet. Please leave a legacy of supporting the people of the United States and do not make yet another concession to enrich an already entrenched and despised corporate sector.

Thank you,

Caleb W. Baker
